

What's New

ISO 14001:2004 Inspection

On Monday 17th February we had our annual ISO 14001:2004 audit, by BSI.

I am pleased to confirm that we passed the audit with flying colours.

Anita from BSI said "The objectives of this assessment have been achieved. Based on the objective evidence detailed within this report, the areas assessed during the course of the visit were generally found to be effective. The business continues to work to reduce the impact of the business processes and activities on the environment, with on-going review of resource, investment in new technologies and working to support the local community with projects."

Overall very good feedback from BSI.

LHR joins with Change London

LHR Express Cars has been asked to become a member of Change London.

Change London are a non profit organisation working with DEFRA to educate and promote green awareness to schools across the country.

One of their major projects is to sponsor air quality monitors and weather stations in schools.

We feel that this is an excellent opportunity for us to get involved with the local community rather than spending money on carbon offsetting.

Electric Ford Focus

We are talking to Ford to see if we can get hold of the new electric Focus, feedback from Change London suggests that this model is worth investigating as a private hire vehicle. Results on the trial will be posted as soon as possible.

Brake Road Safety Charity Awards

LHR Express cars invited to enter in to this years Blake awards. The awards are aimed at companies with an environmental and safe approach to their vehicle management. We have been invited to submit entries,. There are several categories which are similar to the Fleet News and Energy Saving Trust awards which we have won in the past.

The 2014 awards are being held at The St Johns Hotel, in Solihull on the 5th of June. I will keep you all posted.
